# List github-project tickets #35

! Open tessi opened this issue 23 days ago · 1 comment

 tessi commented 23 days ago

bitcrowd me

Github recently introduced a project (canban-board) feature. On the project page, I'd like to use tickety-tick too.

As far as I know, it is not possible to select a single ticket. But a ticket list should be available.

For example in the screenshot above, I'd like to copy my branch-name/commit-message for ticket "#212 Link from offer to order"

**Summary** 1 ticket

**Info**
